

# Oral Cancer Early Detection: A Game-Changing Salivary DNA Test

Dentists and Hygienists are on the front lines of oral health, and often see a patient more often than their primary care physician or any other specialist. As the owner of this important patient relationship, you are deeply committed to oral cancer screening. Yet today, two-thirds of oral cancers are diagnosed in the late stages, contributing to a mortality rate that has not decreased in decades.

***SaliMark<sup>TM</sup> OSCC is the early-detection solution.***

SaliMark, developed by PeriRx, is a game-changing salivary DNA test for oral cancer, now available to dentists. SaliMark can detect oral cancer in its earliest stages.

## Benefits to Your Practice

- Provides cutting-edge molecular DNA screening technology with minimal overhead cost.
- Hygienists administer SaliMark during normal patient interaction; samples quickly collected and packaged for analysis.
- Takes guess work out of specialist referrals.
- Can detect oral cancer in stages 1 and 2, where it is most successfully treatable.
- Billed under approved existing CDT dental and CPT medical codes.

**SaliMark: Next-Generation Oral Cancer Screening**

# Ease of Use For You, Peace of Mind for Your Patients

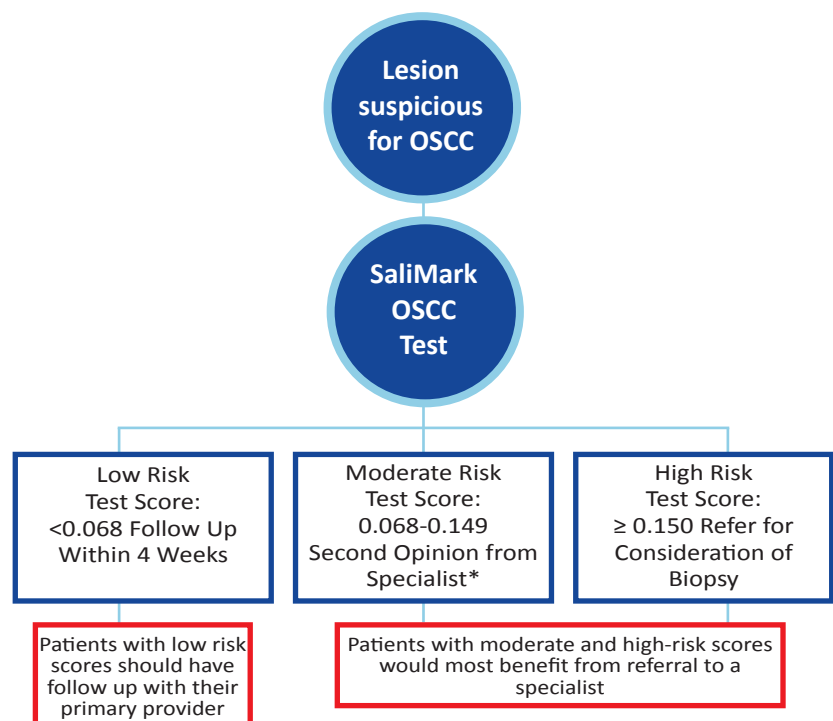

SaliMark is an effective tool to assess patients with oral lesions and other factors placing them at risk. High-risk scores significantly increase the chance of cancer diagnosis.

A decade of clinical research validates SaliMark. More than 900 patients have participated in studies, including independent National Cancer Institute validation and additional rigorous, prospective blinded trials.

## How it Works

- Dentists or Hygienist administers SaliMark to supplement the oral screening exam.
- Clinicians send samples to the lab via pre-paid overnight mailer.
- Test results made available electronically to the clinician within 72 hours.
- Quantitative results provided by SaliMark can aid in identifying patients at increased risk who warrant further evaluation such as biopsy.
- SaliMark lab analysis patient fee can be submitted for reimbursement using existing medical CPT code 81599.

## How to Use the SaliMark OSCC Test Score

\* Specialist decision on biopsy and follow up to be based on quantitative test score, physical examination and risk factors in medical history (smoking, alcohol consumption, age, gender and ethnicity)
